

The `calculate` function performs basic arithmetic operations (addition, subtraction, multiplication, and division) on two input numbers and prints the results to the console.

Function Breakdown:

1. **Parameters:**
 - `num1`: The first number.
 - `num2`: The second number.
2. **Operations:**
 - The function calculates the following operations using the input numbers:
 - **Addition:** `num1 + num2`
 - **Subtraction:** `num1 - num2`
 - **Multiplication:** `num1 * num2`
 - **Division:** `num1 / num2`
3. Each result is logged to the console in the format:
"Operation: Result".

```
function calculate(num1, num2) {  
  console.log("Addition: " + (num1 + num2));  
  console.log("Subtraction: " + (num1 - num2));  
  console.log("Multiplication: " + (num1 * num2));  
  console.log("Division: " + (num1 / num2));  
}  
calculate(10, 5);  
|
```

Output:

```
Addition: 15  
Subtraction: 5  
Multiplication: 50  
Division: 2
```
